ELFNFC18	18/90	Ceramic / Mica	£46.50 per 100

Tubelated Electrodes also available from Stock

Our electrodes are specially designed for the finest quality. Careful quality control at every stage of production, ensures consistently reliable high quality electrodes.

Mica is used to keep the shell and ceramic centralised thus avoiding contact with the glass during bombardment or transportation.

The best glass is selected to withstand the stresses of manufacture, and an accurate annealing
